## LOCATIONS OF THE SURVEY AREA-ADIBATLA

## Objectives of the Survey

- ✓ To sensitize the consumer in targeted Municipality of Adibatla location under ORR limits towards importance of survey.
- ✓ To collect overall information in according to the app by the households in selected locations.
- ✓ To propagate the information regarding vision, objectives and efficient use of water by regular supply in survey locations.

## Overall objective

- ✓ To improve the revenue by proper utilization of water and to supply the safe drinking water to the consumer in ORR limits villages.

Training																					
Preparati on work plan																					
Data collection																					
Data analysis preparati on of report																					

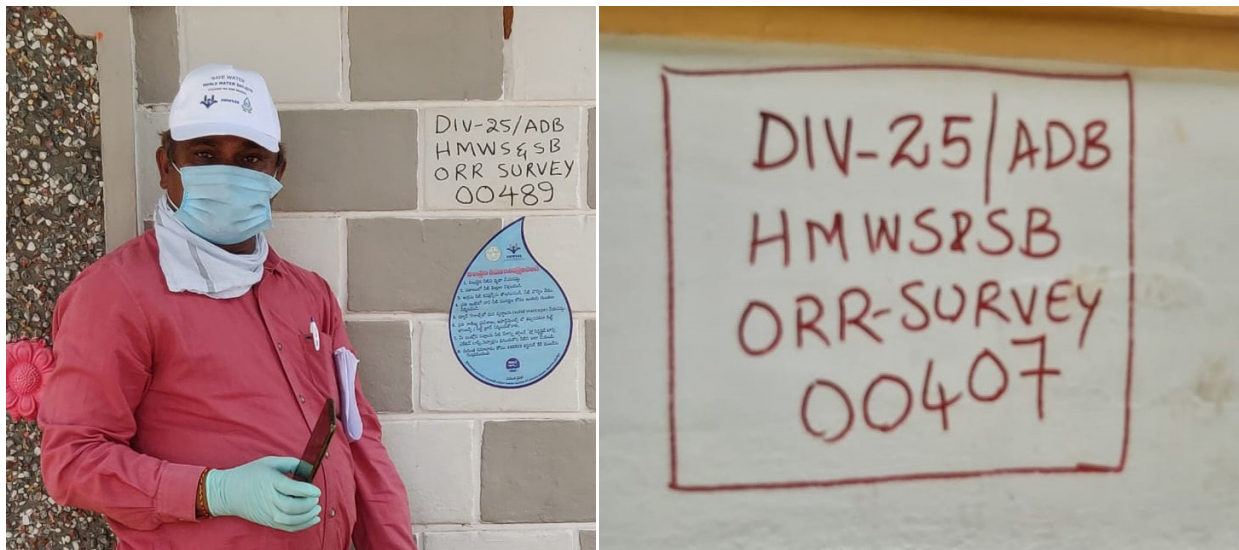

**1.Training (20-06-2020):** The training program conducted by HMWS&SB for strengthening the field investigators and others participants towards constructive software data of mobile TAB, in this context Sri.Abdul Guffur made a presentation on survey which need to be conduct in ORR limits of targeted areas, in that he explained the deliverable things like what ,why and how the survey need to be conducted at field level at the same time explained about operating system of TAB with filling data details by prescribed software.

During the session, other technical experts interacted with filed investigators and other participants about inbuilt data of TAB meanwhile explained about valued points like provisional CANs, house, mobile numbers and other data generated by the developed app and how it can help to the filed investigators for collecting data at field level operation.

**Preparation of work plan(22-23/06/2020):**After the confirmation made by HMWS&SB the NGO representative met concerned General Manager of Division 25 and interacted with him about the survey and collected the list of CANs in overall division which includes Adibatla Municipality also ,meanwhile Sri Swamy–CGM of HMWSSB (ORR) limits has informed us to conduct the survey from 24<sup>th</sup> of June 2020 and with reference to that, the SEED NGO has been informed to all 6 trained field investigators and once again conducted a training program for them at our office level. In this context Chief functionary of SEED has been interacted with the field investigators explained them about taking measurements of each house, plot, created dentity number with numerical order, time plan, work targets and way of tackling with each house hold and to get the data from primary source

## Identification numbers allotted to the houses holds

As per the secondary data, created and allocated the identity numbers to each household for encouraging, inviting and including them into new entity by survey and to build confidence on survey importance and how can it help to reach the survey in transparent mode, at the same time it indicates new sign to the house hold to change their behavior in positive way. In this context with the consultation of General Manager allotted ID number to the households on the bases of formulated items like, to cover the location& division, title of the survey, initiating department and number to be cover from starting to ending in overall division-25.

During the work plan one of our field investigators collected 5 mobile TABs as against proposed six TABs from HMWS&SB. As part of that he collected 792 provisional CANs list of Adibatla which includes Mariyapuram and Mammarajuguda from the board. By next day we conducted a meeting with field investigators at our office and explained them about useful things which involved in the secondary data and clarified all the focused things. As part of it we prepared identity cards for them and issued to field investigators with authorization by HMWSSB & NGO. After that we intimated our eagerness to concerned officers from Adhibatla section which includes General Manager Sri Sridhar.

**Inauguration:** We informed all local CBOs and invited Smt Kamma / Jangaiah ward councilor of Adhibatla Municipality and Sri Sridhar General Manager of HMWS&SB for inauguration of the program and launched developed software app accompanied with Rekha DGM and Sri Chander manager of HMWS&B and other households at ward level and water men of Adibatla. In this context the General Manger initiated to explained the things in brief about the survey and how it can help

the households in regular supply of water by completion of the survey. After that the local councilor participated in marking the identification number which can be allotted to the house.

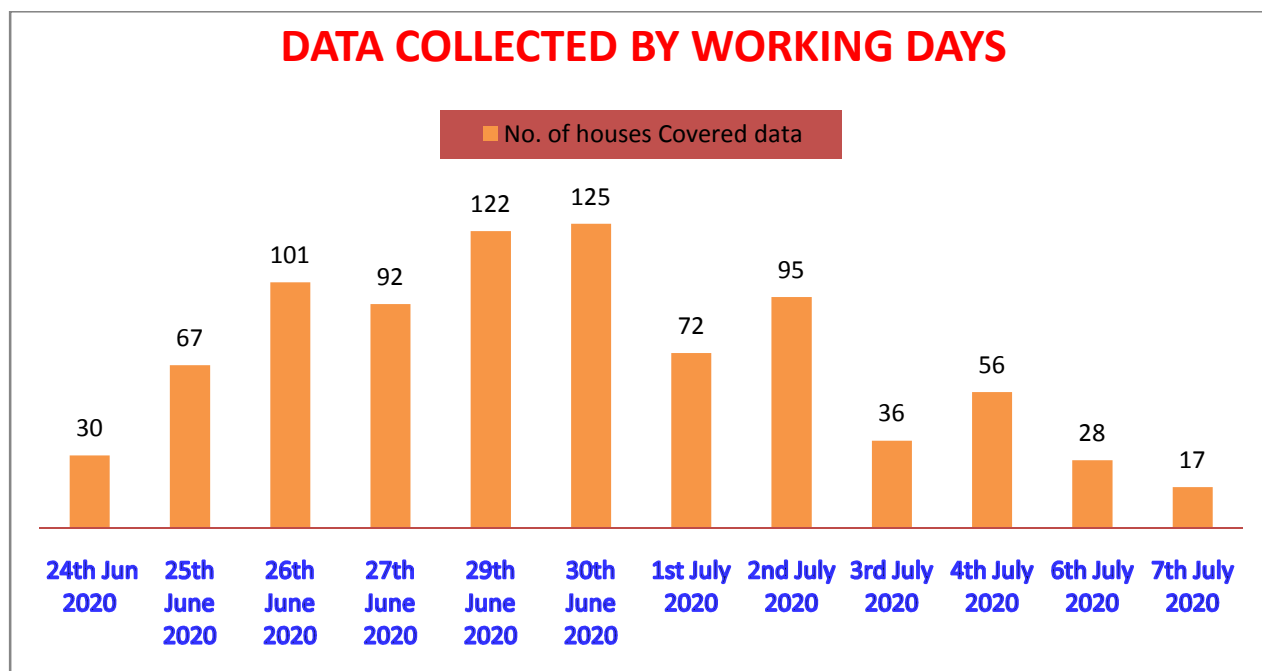

**Data collection:** We worked house to house according to the questionnaire in the app with the team of field investigators along with officers and ward water line men. During this survey the team involved in activities like measuring the house for getting plot and plinth area, conforming the availability of septic tank in each house, status of water connection, status of building whether it is under commercial or domestic, status of house whether it is under M1, M2 and M3 category, status of bulk connection and geo-tagging of the house and checking status of the rain water harvest structure, silt chamber in every house. After that field investigators clicked two images of each house in the provided tab. During the data collection we faced challenge as follows.

### **Faced challenges**

- ✓ Some of households refuse to comply and oppose with field investigators in collecting data which is, taking measurements, verifying water connections and other data.
- ✓ Some of them argue with field investigators about receipt of insufficient water during supply time.
- ✓ Inconvenience created by door locked houses in the field which resulted delay in getting the plot measurements and other verifying data.
- ✓ At the time of collecting data we faced problems with absence and migrated householders and it caused zero contacts with the house holders this lead the field investigator face challenge to get the mobile numbers in time. At the same time tenants were irresponsive with the survey team.
- ✓ Faced problems with poor mobile network in the peak time and some errors in mobile applications.

### Statement showing daily wise data collected by the team

Working days	No. of houses Covered data	Remarks
24 <sup>th</sup> Jun 2020	30	Covered low-due to initial arrangements.
25 <sup>th</sup> June 2020	67	Moderate
26 <sup>th</sup> June 2020	101	High
27 <sup>th</sup> June 2020	92	High
29 <sup>th</sup> June 2020	122	High
30 <sup>th</sup> June 2020	125	High
1 <sup>st</sup> July 2020	72	Moderate
2 <sup>nd</sup> July 2020	95	High
3 <sup>rd</sup> July 2020	36	Low(Due to repeated data )
4 <sup>th</sup> July 2020	56	Low(far away from house to house)
6 <sup>th</sup> July 2020	28	Low(far away from house to house)
7 <sup>th</sup> July 2020	17	Low(far away from house to house)
<b>Total</b>	<b>841</b>	

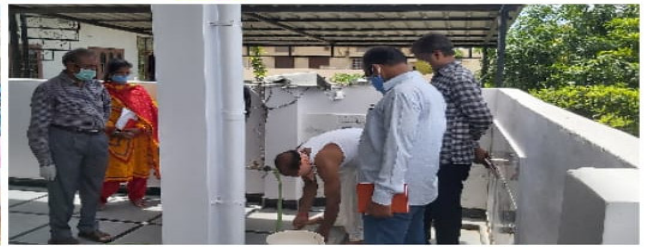

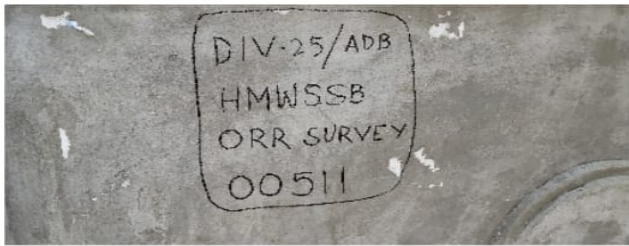

**Data analysis:** Total Number of provisional CANs (792), the same has been received from secondary source in which repeated CANs are 80 as against 792, as per the available data 712, the data collected by field investigators at primary sources is 841 for 12 days in Adibatla, Mariyapur, Mammarajuguda and Indhiramma colony locations and consisting different labeling at primary sources in different locations in which it was observed that the houses with generated new CANs are 99 and in addition to that 20 houses do not have the house numbers. The additional data collected by field investigators is 129 it is approximately 15%.

From the total houses, multiple connections are 13, Multi stored buildings under commercial -07, house under multi stored with domestic -20 and 642 single stored with domestic status. According to recorded data 688 houses are not having Rain water harvesting Structures as against 841 houses in four locations in which 68 houses are maintained well and other 85 are not maintained properly as against existing RWHS in 153 houses. With reference to recorded data which regards the status of silt chambers it was observed that 793 are maintaining silt chambers as against the 841 houses. Some of them drain out the sewerage water to the outside lanes, at the same time we observed that in some cases septic tank connections are used by more than one house holder. There is no water connections in 99 houses & dismantle houses; due to this we are unable to cover the data regarding pipe sizes and other information in prescribed application. We observed poor water supply services in some undulated areas.

**a. Reference tables (Received Data from Secondary source)**

S.No	Name of the locations	Total CANs	Remarks
1	Adibatla local	712	
2	Mamarajuguda	00	
3	Mariyapuram	80	
4	Indhirammacolony	00	
	Total CANs	792	

**b.Total available data**

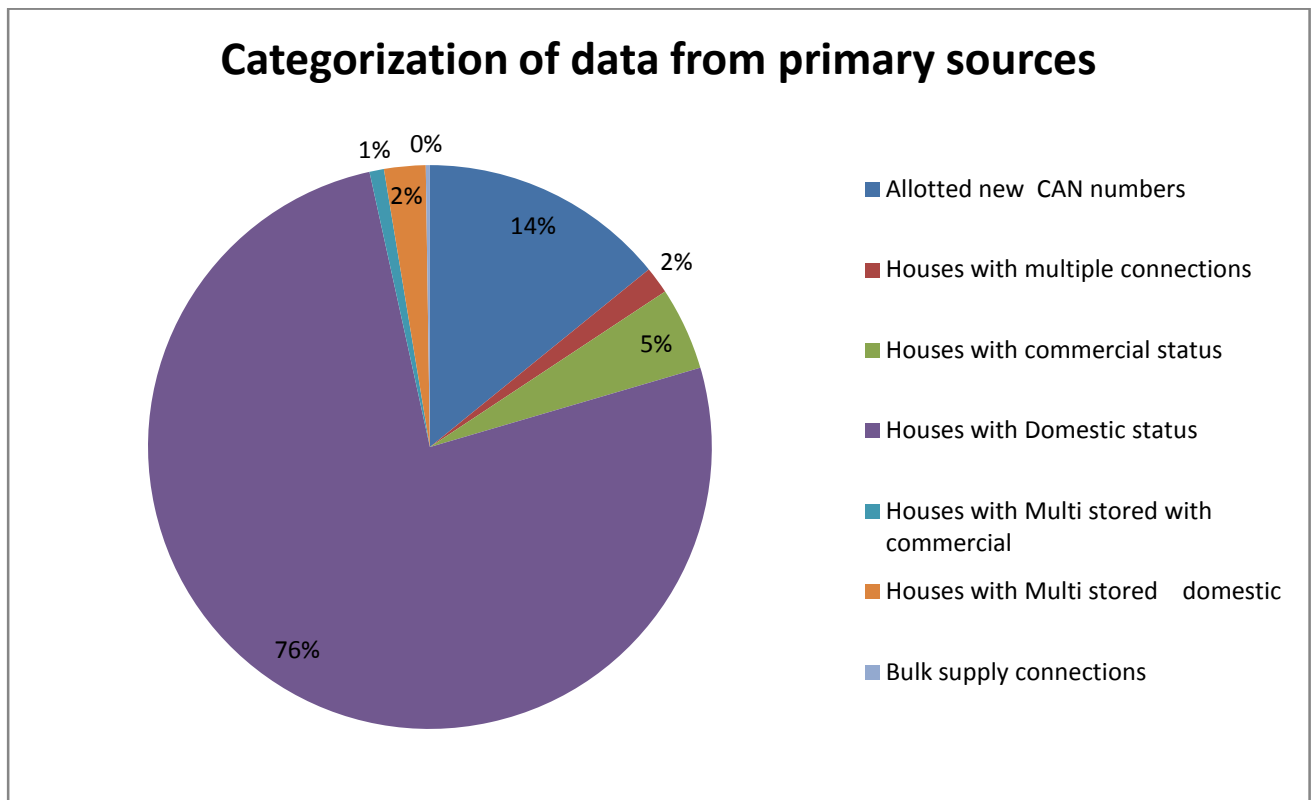

Initially available data excluded repeated CANS	Collected in additionally	Total data collected	Percentage of increased data at primary source
712	129	841	15.33

**c. Location wise Data collected at Primary source**

S.No	Name of the locations	Total CANs	Remarks
1	Adibatla local	712	Received one existing CAN number on favor of TCS in which we gathered information and collected justified data as per the present situation

### **Key results /Impact of the survey**

- With the great support and participation of officials from water board in the survey along with field investigators and NGO coordinator ,the households are more excited for conducting the survey with more transparency (for giving identification numbers for each house) it indicates to the increase in more confidence on water board and they realized and felt very happy
- Most of them are eagerly waiting to pay their regular bills with regular water supply
- Generated accurate and very transparent data and it helps to get good revenue for water board.
- The people of multi stored under commercial also came forward to revive their data.
- During the survey consumer /householders are known about the qualitative and quantitative data which is generated from their home by verification

### **Recommendations**

- As per the survey guidelines it was observed that , each investigators should cover 20 houses per day, but it is not possible in the field, due to one person cannot handle to maintain the measuring of plot , operating TAB ,recording the remarks.
- It is possible to cover 30 houses per day while appointing two persons which includes one line men& FI) exclusive of HMWSSB officers.
- Need to rectify TAB errors (exp. 1.Unable to record all the remarks in remarks option which is included in septic tank verification option 2.TAB application is not accepting decimal numbers and need to rectify the problem
